# LDC-80DA

https://www.mean-well.ru/store/LDC-80DA/

### Features

- Constant Power mode output
- Metal housing design
- Full Power at 70~100% max Current
- $\cdot$  Built-in active PFC function
- Flicker Free design
- $\cdot$  No load / Standby power consumption <0.5W
- · Output current level pre-settable
- Function options: 3 in 1 dimming (dim-to-off); DALI interface, push dimming
- Typical lifetime>50000 hours
- SELV and Isolated
- $\cdot$  Class 2 power supply
- · 5 years warranty

### Description

LDC-80 series is a 80W AC/DC LED driver featuring the constant power mode output. LDC-80 operates from 180~295VAC and output current can be adjust between 700mA to 2100mA. Thanks to the efficiency up to 90%, with the fanless design, the entire series is able to operate for  $-25^{\circ}C + 85^{\circ}C$  case temperature under free air convection.LDC-80 is equipped with various function options, such as dimming methodologies, so as to provide the optimal design flexibility for LED lighting system.

NOTE	<ol> <li>All parameters NOT specially mentioned are measured at 230VAC input, rated current and 25°C of ambient temperature.</li> <li>Please refer to " OUTPUT CURRENT SETTING ".</li> <li>De-rating may be needed under low input voltages. Please refer to "STATIC CHARACTERISTIC" sections for details.</li> <li>Length of set up time is measured at first cold start. Turning ON/OFF the power supply may lead to increase of the set up time.</li> <li>The driver is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again. (as available on https://www.meanwell.com//Upload/PDF/EMI_statement_en.pdf)</li> <li>This series meets the typical life expectancy of &gt;50000 hours of operation when Tcase, particularly to point (or TMP, per DLC), is about 75°C or less.</li> <li>Please refer to the warranty statement on MEAN WELL's website at http://www.meanwell.com</li> <li>The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft).</li> <li>To fulfill requirements of the latest ErP regulation for lighting fixtures, this LED power supply can only be used behind a switch without permanently connected to the mains.</li> <li>X product Liability Disclaimer : For detailed information, please refer to https://www.meanwell.com/Gen/ice/Disclaimer.serv</li> </ol>

#### ※DALI interface

#### ◎ PUSH dimming(primary side)

Action	Action duration	Function
Short push	0.1~1 sec.	Turn ON-OFF the driver
Long push	1.5~10 sec.	Every Long Push changes the dimming direction, dimming up or down
Reset	>11 sec.	Set up the dimming level to 100%

• The factory default dimming level is at 100%.

• If the push action lasts less than 0.05 sec., it will not lead to a change for the status of the driver.

• Up to 10 drivers can perform the PUSH dimming at the same time when utilizing one common push button.

• The maximum length of the cable from the push button to the last driver is 20 meters.

 The additive push button can be connected only between the LS terminal, as displayed in the diagram, and AC/L (in brown or black); it will lead to short circuit if it is connected to AC/N.

#### ○ DALI interface(primary side)

• Apply DALI signal between DA+ and DA-

DALI protocol comprises 16 groups and 64 addresses.

- First step is fixed at 8% of rated output power.

NOTE: DALI, Push dimming can not be used in the same time! (The factory setting defaults to DA)

#### ■ TEMPERATURE COMPENSATION OPERATION

LDC-80 have the built-in temperature compensation function; by connecting a temperature sensor (NTC resistor) between the +*NTC* /-*NTC* terminal of LDC-80 and the detecting point on the lighting system or the surrounding environment, output current of LDC-80 could be correspondingly changed, based on the sensed temperature, to ensure the long life of LED.

© LDC-80 can still be operated normally when the NTC resistor is not connected and the value of output current will be the current level selected through the IADJ. pin

#### $\bigcirc$ NTC reference:

NTC resistance	Output Current
<17.5K	Output current reduce as the resistance decreases
>17.5K	Normal output current

Notes: 1. MEAN WELL does not offer the NTC resistor and all the data above are measured by using resistor.

2. If new brand of NTC resistor is applied, please check the temperature curve first.

 $\odot$  Dimming function of the driver will be invalid when the "temperature compensation" function is in use.
