XLN-60 series

(Independent type)

Features

- Constant power mode output with multiple stage selectable by NFC setting (H-type)
- Constant voltage mode output available(12/24/48V)
- · Plastic housing with class II and PFC design
- Meet UL8750 Class 2 / Class P power unit
- Flicker free, complying with CE ErP directive
- Standby power consumption <0.5W
- Meet emergency lighting (EL) application
- · Fully encapsulated with IP67
- Minimum dimming level 0.1% (DALI-2 DT6)
- Dimming functions: 3 in 1 dimming (Dim-to-off)
 DALI-2 + Push dimming
- 5 years warranty

Description

XLN-60 Series is a 60W with constant power and constant voltage output LED driver . It can operate from 100~305VAC and output current ranging between 900 mA to 1700 mA selectable by NFC setting. Thanks to high efficiency up to 90%, it is able to operate for $-25^{\circ}C$ ~90°C case temperature under free air convection. XLN-60 is designed based on latest safety regulation with 3 in 1 and DALI-2 dimming. XLN-60 can be adjusted for brightness with a push button as a simple way dimming, so it provides more flexibility for LED Lighting application.

•	Model E XLN - 6			
		Series name		
	Туре	Function	Note	
	Blank	H type output current selectable by NFC setting with constant power mode		
		12, 24, 48V Constant voltage output		
Γ	В	H type output current selectable by NFC setting and built-in 3 in 1 dimming		
		12, 24, 48V Constant voltage output and built-in 3 in 1 Dimming(PWM Style output)		
Ī	DA2	H type output current selectable by NFC setting and built-in DALI-2 dimming		
		12, 24, 48V Constant voltage output and built-in DALI-2(PWM Style output)		

Note: 1. 12/24/48V output is fixed without NFC Function.

2. For more current setting, please contact MW sales representative.

Applications

- Recessed Light
- Down Light
- Panel Light
- Commercial Lighting
- Decorative Lighting
- LED strip lighting
- DALI digital Lighting

60W Multiple-Stage Constant Power/Constant Voltage LED Driver

XLN-60 series

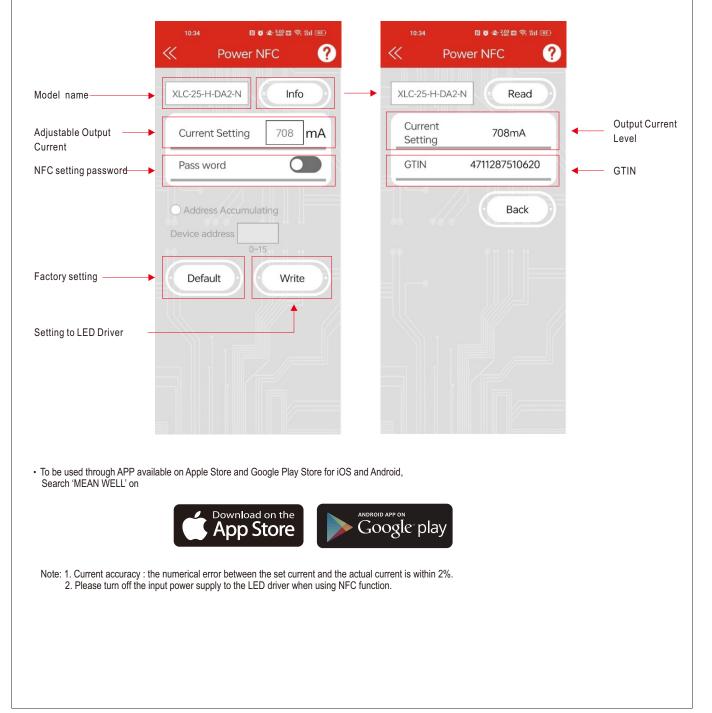

NFC Function Description

The output current of the NFC Mode LED driver can be adjusted using NFC via the mobile APP

- Operation Instruction:
- Compatible phone
- Install an NFC-compatible smart mobile device or phone with Android[™] 4.1 or IOS12 updates.
- · Steps for setting output current via NFC
- 1. Download Meanwell APP on mobile device or mobile phone, and enable NFC function.
- 2. Check the NFC antenna position of the mobile phone please.
- 3. Enter Meanwell APP -> Top left menu Installation Manual/APP-> PowerNFC, approach the LED driver NFC sensing position and perform sensing.
- 4. APP displays the functional parameters, and the relevant parameters are modified as required.
- 5. Tap the APP write button and quickly move the phone antenna close to the NFC sensing position of the LED driver.
- 6. The write completes when the mobile phone displays"Success".

APP Function Description

X APP Interface:

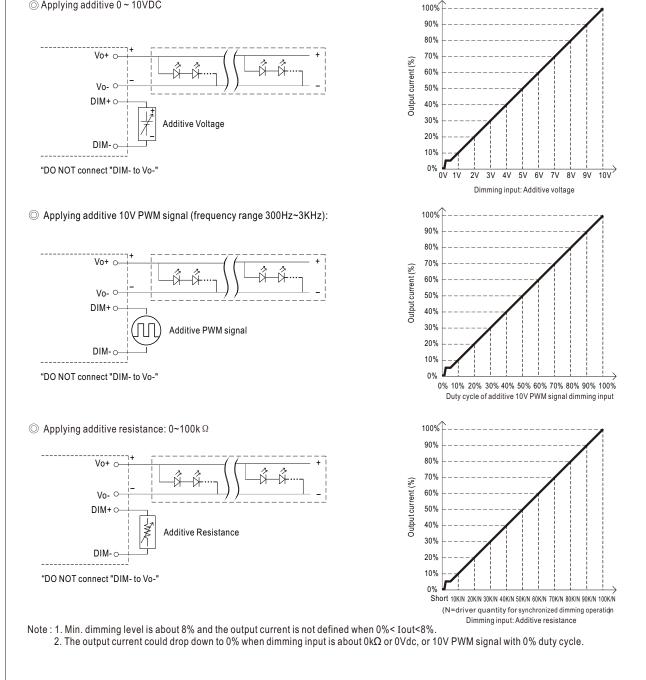

XLN-60 series

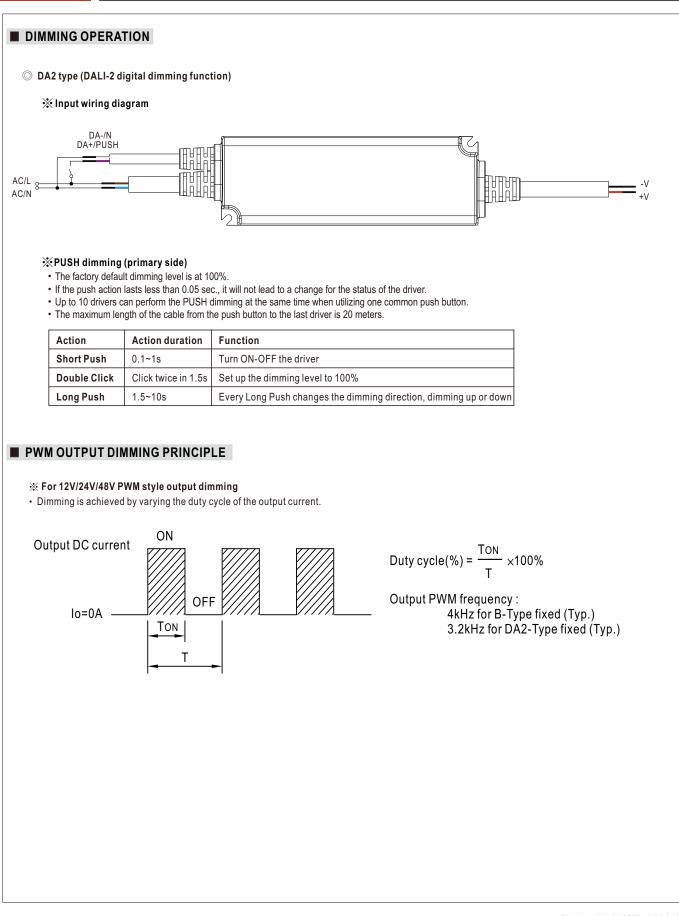

DIMMING OPERATION

O B type

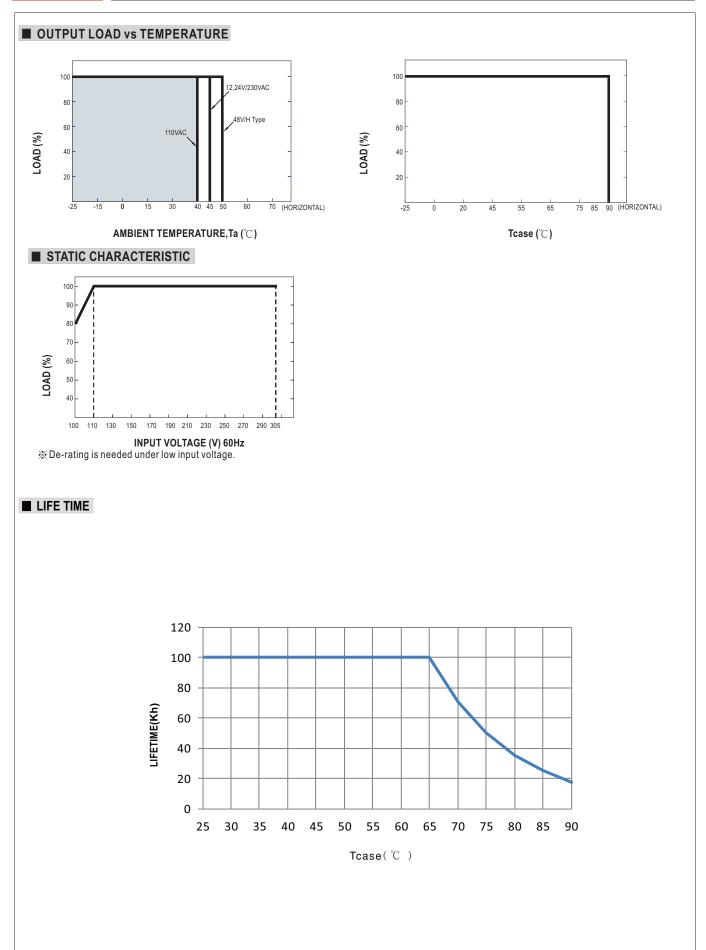

- **※** 3 in 1 dimming function
- Output constant current level can be adjusted by applying one of the three methodologies between DIM+ and DIM-: 0 ~ 10VDC, or 10V PWM signal or resistance.
- Direct connecting to LEDs is suggested. It is not suitable to be used with additional drivers.
- Dimming source current from power supply: $100 \mu A (typ.)$
- Applying additive 0 ~ 10VDC
